Design is networked

HEXAGON
shaw contract group®

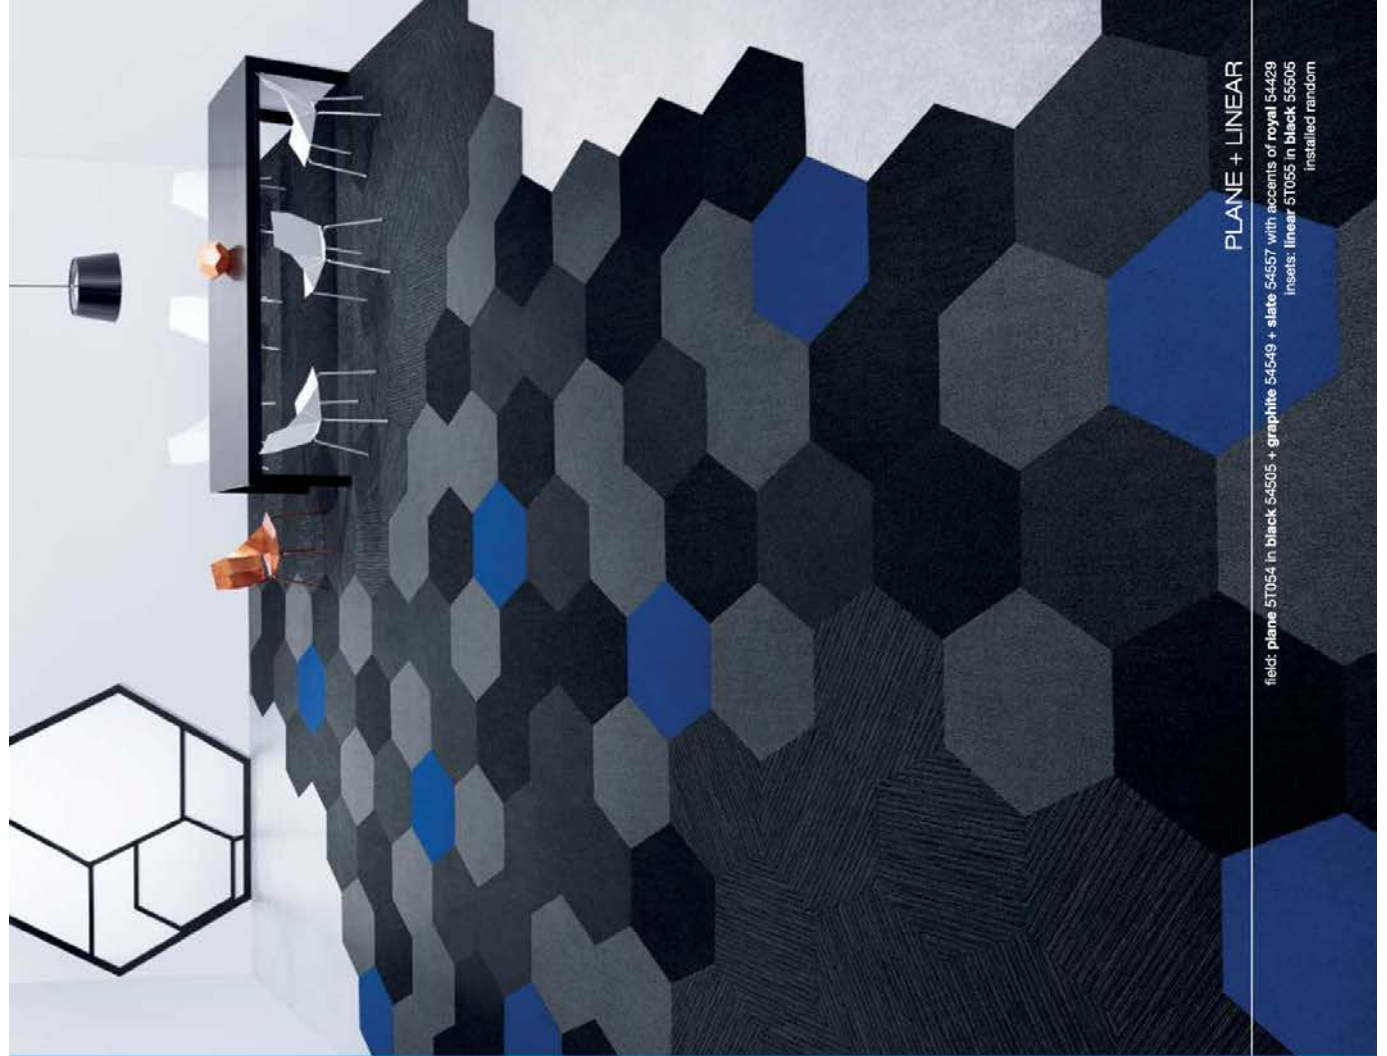

THERE ARE TO SIX SIDES TO EVERY CONNECTION

Hexagon reflects the cultural shift toward more collaborative environments—influencing the ways we work, walk, communicate and create. This new shape of carpet tile design will change the way you move through a space, veer you off the beaten path and encourage collaborative chemistry. Build a social hive. Form new communities.

Design is networked

Six-sided Sustainability

Hexagon is Cradle to Cradle Silver Certified and uses premium Eco Solution Q[®] fiber with 45 percent recycled content.* All tiles feature EcoWorx[™] backing, which is completely recyclable, PVC-free and contains 44 percent recycled content. Hexagon contributes to LEED credits, including recycled content, low-emitting materials and innovation in design.

* Recycled content is based on allocated nylon fiber from Shaw's total nylon fiber production and determined as a percentage of total Eco Solution Q output. Actual recycled content in this product will vary.

A mathematical wonder at work

INSPIRED NETWORKS

We collaborated with some of design's most respected connectors—designers who network to bring people, minds and causes together. We wondered what they would create with Hexagon. The result? Three dynamic installations that reflect their idea of design.

Chris Heard + Stephen Wells
Principal + Senior Designer from Hendrick, an Atlanta-based firm providing interior design and facility consulting services in the corporate office and healthcare industries.

John Peterson Founder and President of Public Architecture, whose 1% program has built a national network of design professionals providing \$42 million in pro-bono services annually.

Michael Murphy Founding Partner and Executive Director of MASS Design, a global innovator incubator using design and public health to solve some of the greatest global crises of our time.

COLLECTIVE MOMENTUM

"Partnerships across the public, social and private sectors are invaluable in leveraging individual strengths for collective monumental impact."

Michael Murphy
Co-Founder + Executive Director, MASS Design Group
Boston, MA

COLLABORATIVE CHEMISTRY

"The way Hexagon brings groups together for community and conversation is a lot like what a molecular compound does. And great chemistry is important to how teams can bond and come up with great ideas."

Chris Heard + Stephen Wells
Principal + Design Director | Senior Designer
Hendrick | Atlanta, GA

SOCIAL WEB

"A web of connections reflecting the multiple layers and networking of Design Access, which brings together groups with a vested interest to improve social and environmental outcomes."

INTERCONNECTED INSTALLATION

How will you network Hexagon? We have an interactive tool for that. Start visualizing here, then go online to construct your own interconnected installations at shawcontractgroup.com. Social hives now forming.
