

Vitality homogeneous sheet features a subtle non-directional visual with softly blended tones. The homogeneous construction is the perfect foundation for high-demand environments.

Available in 24 engaging colors from neutrals to brights, it provides a wide range of palette options.

Color Creates Composition

Use Vitality's colors together to create dynamic installations and bright features that highlight the function of any space.

Analogous Color

Create simple, coordinated palettes with ease.

Color Gradients

Vitality features shifts in neutrals that build depth into the colorline, allowing you to separate space with subtlety.

Vitality Homogeneous Sheet

ExoGuard[™] Finish Adds resistance to staining and abrasion

Homogeneous Layer Operates as the visual, core and backing layers all in one

Resistant to Medical Stains

Vitality provides improved resistance to common medical stains including betadine, blood and hand sanitizer.

Static & Rolling Loads

Vitality performs in environments with heavy static and heavy rolling loads per ASTM test methods.

Polish-Optional Reduces Cost

ExoGuard[™] is a polish-optional finish that can reduce the cost of annual maintenance.

Durability in Demanding Environments

ExoGuard[™] finish adds resistance to staining and abrasion.

Underbed Warranty

4100 and S150 adhesives create a bond between the floor and the substrate that protects against potential movement issues allowing for use in extreme environments like heavy rolling and static loads.

Extended Colorline

Vitality is available in 24 colors featuring core neutrals and bright colors.

Product Specification

Construction	ASTM F1913 - 2.0 mm Commercial Homogeneous Sheet Non Ortho-Phthalate Construction	
Static Load Limit	ASTM F970 - modified PSI 2000, measures the indentation and recovery of heavy static loads	
Light Fastness	ASTM F1515 - passes, ensures the product will not discolor when exposed to light over time	
Slip Resistance	ASTM D2047 – Wet, passes Dry, passes	
Available Sizes	Width - 78.94 inches 2 meters Length - 65.94 feet 20.1 meters	
Styles & Colors Available	Vitality Homogeneous Sheet 0873V 24 Colors	

Warranty	10 Year Commercial Warranty 10 Year Underbed Warranty when installed with Shaw 4100 or S150 Adhesives	
Packing area by roll area by pallet weight by roll weight by pallet	US units metric 47.84 yd ² 40 m ² 574.08 yd ² 480 m ² 284 lbs 129 kg 3501 lbs 1588 kg	
Weld Rod	Color coordinating weld rods for seam integrity in heavy traffic environments	
Installation Method	Reverse install, Abstracted visual allows for clean flash coving	
Recommended Adhesive	4100 and \$150	

Interdeco®

Social Responsibility

Materials & Resources IEQ - Floorscore® IAQ Certification

Ortho-Phthalate Free Manufactured to be free of ortho-phthalates

Solar Energy

Certified for low VOCs

With the largest rooftop-mounted photovoltaic solar array in the southeastern U.S., Shaw generates 1 megawatt of power per year-- the equivalent to removing 198 passenger vehicles from the road.

Water Use

For every 1 pound of finished product, Shaw has reduced the amount of water required to produce it by 36%.

Carbon Disclosure Project

As global citizens, Shaw encourages transparent discussion surrounding our carbon footprint. Each year, we submit our third-party verified carbon emissions to the CDP.

Infection Control

In aseptic environments, we know cleanliness is top of mind. Vitality Homogeneous Sheet is ideal for these demanding environments from its construction to its installation methods.

Vinyl Construction

Vinyl inherently does not support the growth of microbes, mold, bacteria or mildew.

Heat Weld

Color coordinating weld rods are available in all colors of Vitality. These installations create superior seam integrity that prevents liquids from permeating to the floor below.

Flash coves

The abstract non-directional visual in Vitality allows for clean flash coving up the wall in acute care environments. Flash coves create easy to clean edges and corners for the environments where clean matters.
