CLIMATE TAKE BACK™

Climate change is undeniable. And
reversible. Our mission is to prove it.
**Join the #ClimateTakeBack and
help create a climate fit for life.**

Human Connections™ Collection

Today, we are both more connected as a society and, ironically, increasingly less connected, shielded from each other and the natural world by our screens, our cars, our homes and the buildings in which we work. But when we walk outside, our pathways reveal the importance of reconnection: the choices we make in our destinations, how we get there and the unexpected gathering places that we happen upon. Invariably we are also drawn to areas of respite where nature is present, nurtured to grow in the environment or simply there by its own persistence.

Human Connections is literally the intersection of the sensory cues that we seek to include in our fast paced lives, supporting the idea that the most positive spaces offer variability and choice. Eight different styles fit together in unique ways to create paths, intersections, collision zones and destinations. Sett in Stone™, Kerbstone™, Paver™ and Flagstone™ are four textures that recall the well-worn streets of the city, while Moss™ and Moss in Stone™ attach seamlessly to Sett in Stone to introduce the greenery we crave in a very organic way.

To complete the collection we have included two styles from FLOR®, Rue™ and Stone Course™. These highly patterned and colorful styles add a lively graffiti-like impact.

Create your path to +Positive spaces with Human Connections.

Interdeco

i2® Modular Carpet
Minimize waste & save money.
Interface's i2® styles have mergeable dye lots. That means i2 tiles from different dye lots always blend with tiles of the same color, even when individual tiles are selectively replaced years later. This minimizes the need for attic stock and saves money. And i2 styles that install non directionally generate an average of only 1.5% installation waste as compared to 3-4% for typical modular carpet and an average of 14% for traditional roll carpet.
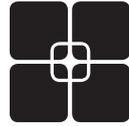

TacTiles™
No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives. TacTiles are approved for use on GlasBac™, GlasBacRE, CQuest™GB, Graphlar™ and Graphlex™.
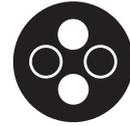

Intersept®
Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria— guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde. Intersept is standard in Interface carpet tile products backed with GlasBac, GlasBacRE, CQuestGB, ReadyBac™, and CushionBac Renew™.

ReEntry™
Recyclable. Through our ReEntry program, we reclaim all Interface carpet tile. The result? Carpet tile products with up to 85% total recycled content, including as much as 25% post-consumer content.

Sustainability Transparency
Transparency and certified sustainability leadership come standard on Interface products, including published ingredients in HPDs (Health Product Declarations) and published EPDs (Environmental Product Declarations), which are based on full life cycle assessment (LCA). And, Interface carpet products are certified to the NSF 140 Sustainable Carpet Assessment Standard. Additionally, Interface flooring and recommended adhesives are 3rd party certified for low VOC emissions in compliance with California Department of Public Health (CDPH) Standard Method v1.2–2017. Carpet products made in our US facilities are made with 99% renewable energy.

Third Party Verification
The flooring products that we sell, including carpet tile, are carbon neutral across their full product life cycle through our third party verified Carbon Neutral Floors™ program. To find out more, visit interface.com/carbonneutral

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

FLOR
FLOR by Interface offers lush textures and bold patterns that are anything but business as usual. FLOR carpet tiles are the perfect design accent for offices, conference rooms and high-profile collaborative spaces – as area rugs or wall-to-wall installations. With all the performance benefits of Interface products, including the 15-year commercial warranty, they'll get the job done for years to come.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

InterCircle Sample Return
Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.
