LEFT: **RESPITE (4090V)** IN CABIN (90506) AND **TRANSFORM COLOR (5T311)** IN WILD FLORA (05411) | INSTALLED STAGGER

Take a quiet moment to recharge.
Respite creates warmth and a
calming space to unwind.

The innovative COREtec XRC technology delivers high performance and durability in heavy commercial environments. The patented construction is dimensionally stable, waterproof, and scratch resistant.

Respite's attached cork underlayment reduces sound transmission, delivering a human centered solution for public and private spaces. Designed with locking edges, installation is quick and easy, reducing time and labor cost.

Respite is designed with human impact in mind, free of ortho-phthalates and is FloorScore and Greenguard Gold certified, assuring healthy indoor air quality and low VOC emissions.

Color and Visual Variation

Color and visual variation is inherent in all modular resilient products. It can vary slightly or significantly from piece to piece within a color. V1 has little or no variation from piece to piece. V4 will have a large variation in color and visual.

V1
uniform appearance

V2

Waterproof
COREtec® XRC is 100% waterproof and can be installed in areas with topical moisture such as lobbies, reception areas, kitchens and bathrooms.

Scratch Resistant
ExoGuard™ finish combined with low gloss and proper embossing provides excellent stain, scratching and abrasion resistance.

Reduces Sound Transmission
COREtec XRC features an attached cork underlayment that provides added sound dampening from floor-to-floor sound transfer.

Faster Installation
Installs 12× faster than comparable products. Installs right out of the box with no product acclimation time with little or no floor prep required.

Reduces Cost
Floating installation allows installation over existing hard surfaces with little or no floor prep. It will not telegraph and will hide many sub-floor imperfections.

No Expansion Joints Required*
Superior dimensional stability with less expansion and contraction than standard LVT.

| Product Details | Installation Methods | Recommended Adhesives | Coordinating Accessories |
|---|---------------------------|----------------------------------|---|
| Pattern Repeat** Repeat Width 38.74 in 98.40 cm Repeat Length 62.20 in 158.00 cm | Ashlar, Brick and Stagger | Shaw 4100, Shaw 200 or Shaw 4151 | Quarter Round, T-mold, Baby Threshold, Reducer, Overlap Stair Nose and Flush Stair Nose |

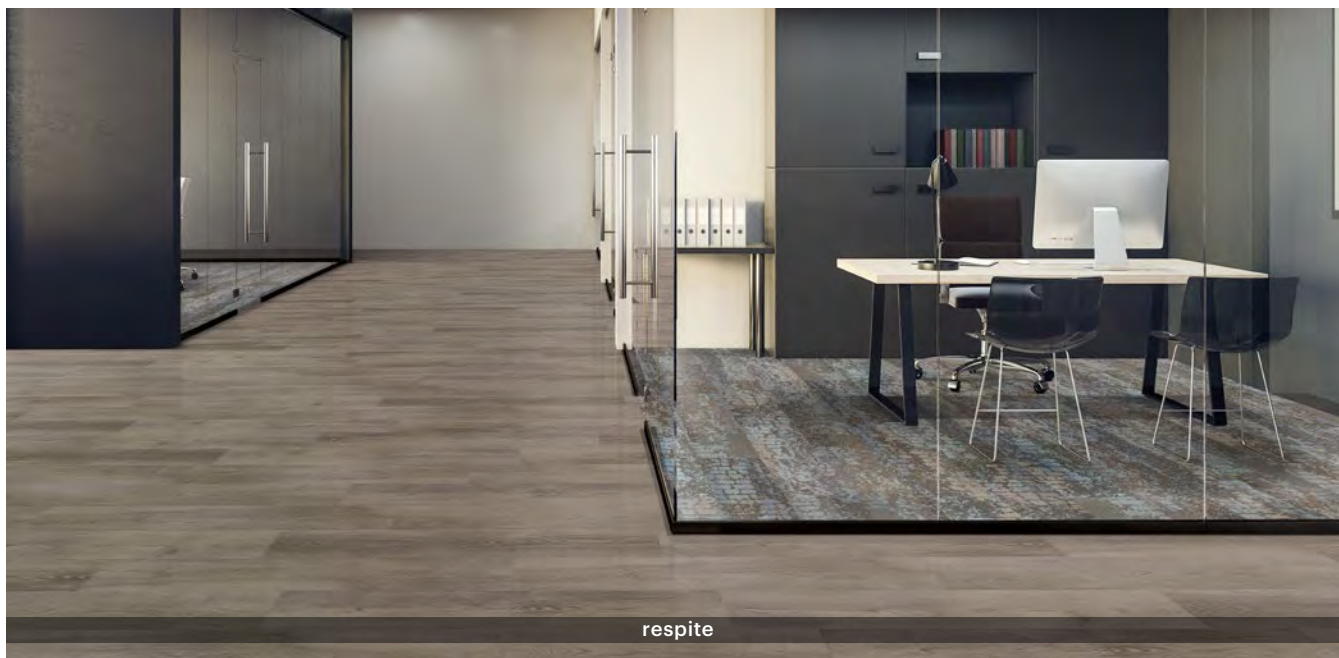

Recommended Applications

Ideal for Heavy Commercial Environments:
Education | Healthcare | Workplace | Retail
Multi-family | Senior living | Hospitality

| | | | |
|---------------|-------------|----------|-------|
| | Light | Moderate | Heavy |
| Foot Traffic | <div></div> | | |
| Rolling Loads | <div></div> | | |
| Static Loads | <div></div> | | |

* An expansion joint is an intentionally plaed gap in a flooring installation covered by a t-mold transition strip that allows for the expansion and contraction of a product within a room to accommodate temperature fluctuations and movements within the building's structure. Expansion gaps at walls are still required.

** Tile size is not divisible into pattern repeat length resulting in a wide variety of unique tiles after the cutting process.

This product is manufactured and sold for floorcovering use only. To meet warranty requirements, approved adhesives must be used for glue-down application as outlined in the Shaw Contract installation instructions. Installation and maintenance instructions can be found on shawcontract.com. Specifications are subject to nominal manufacturing variances. Material supply and/or manufacturing processes may necessitate specification changes without notice. Not for use in commercial wet areas due to slip and fall concerns.
