No matter how far away we may travel, we all desire a quiet place to rest. A place to unwind. A place to recharge. A place to remind us of home—different, but still familiar.

Why not transform that “home away from home” feeling with a biophilic point of view? The natural world is restorative to the mind and the body, and we approach the design of a guest room in much the same way—a private, calming retreat that allows for connection, introspection, and relaxation.

The Guest Rooms Collection is a study in how texture, pattern and color can influence the experience of a space. We have assembled 19 of our standard RMS carpet styles into color palettes that evoke four distinct shades of nature. Pair with our LVT as an inset area rug, or play with differing textures, patterns and custom colors for a unique guest room floor.

Awaken. Follow the sun as it travels from airy morning to vibrant mid-day to dreamlike dusk.

Carbon Neutral Floors
Our Carbon Neutral Floors program is annually verified by a third party.

Sustainable Assessment for Carpet
The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus
An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Environmental Product Declaration (EPD)
A statement of product ingredients and environmental impacts over the entire lifecycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and the LCA must be third party verified.

WHY MODULAR FLOORING?

Flexibility

Keep Your Floor Beautiful. Modular flooring allows you to play with pattern and design without having to special order sizes. And the same flexibility that lets you create your floor helps you keep it looking good because in-house staff can easily replace individual tiles that become damaged or heavily soiled—no down time or outside contractors required.

Intersept®

Mold Protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria — guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

Sustainable Choice

Environmental Responsibility. More than 95% of Interface products manufactured in the Americas carry the GreenCircle Certified Environmental Facts label, which has verified that standard Interface products are manufactured using 99% renewable energy and offer a minimum of 66% and 80% total recycled content when backed with GlasBac and GlasBacRE backing respectively.

CushionBac Renew™

Get Comfortable. Enjoy greater comfort underfoot and improved acoustics with our high performance CushionBac Renew backing. The 21 oz. felt cushion provides less resistance to footfalls and increased sound absorption to create a more comfortable environment overall. As one of our low carbon options, CushionBac Renew also offers a total product recycled content of up to 76% (up to 25% post-consumer content), and can be recycled into our GlasBac™RE backing.

TacTiles™

No Glue Installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering carpet tiles securely together to form a floor that “floats” for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

Less Waste

Save Money. Interface Hospitality's modular flooring averages just 3.9% installation waste compared to as much as 18% or more with patterned roll carpet. Use our non directional styles with an average of 1.5% waste and save even more. That means more of your flooring investment stays on the floor—not in a dumpster.

Carbon Neutral Floors™

Create a Climate Fit for Life. All of the flooring products sold by Interface – carpet tile, LVT, and rubber – are carbon neutral and third party verified. We've taken a holistic approach to achieve carbon neutrality, first through reducing the carbon footprint of our products and then using carbon offsets for the remainder, including the emissions from raw materials, our manufacturing processes and product use to end of life.

ReEntry™

Closing the Loop. We want our carpet tile and LVT back. Through our ReEntry program we reclaim and recycle our used carpet tile and LVT and turn it into new flooring. We'll even take many of our competitors' products. The result? Products with up to 89% total recycled content, including as much as 27% post-consumer content.
