BIOPHILIQUE

BIOPHILIQUE Collection

By Virginia Langley

BIOPHILIQUE

Biophilic design is a new consciousness toward incorporating the natural world into our modern and technologically advanced world. This new trend helps connect mankind to their inherent attachment with nature and the well-being received when living and working in environments that combine nature and technology with contemporary lifestyles.

I truly believe in this philosophy and principal in designing and want our market designs to help encourage and support this trend of incorporating nature into our environment more. Indirect and direct applications of light, air, land, water and plant are reflected in each design piece that I've created.

Biophilique is an innovative design collection with bold trending styles, textures & colors artistically interpreted with abstract flare & an appeal to all the senses.

—Virginia Langley

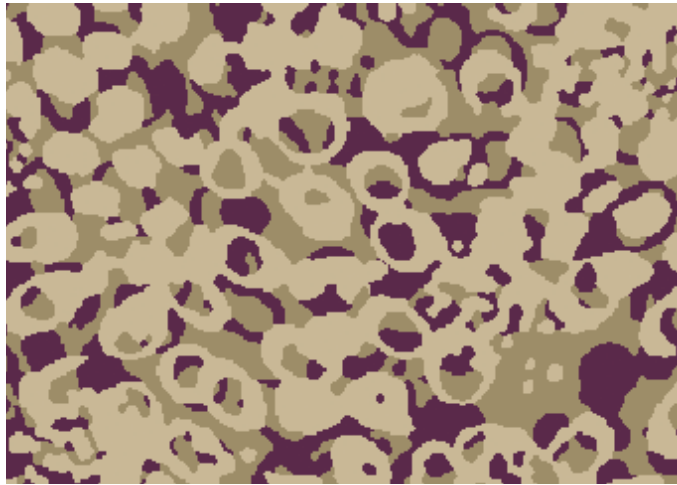

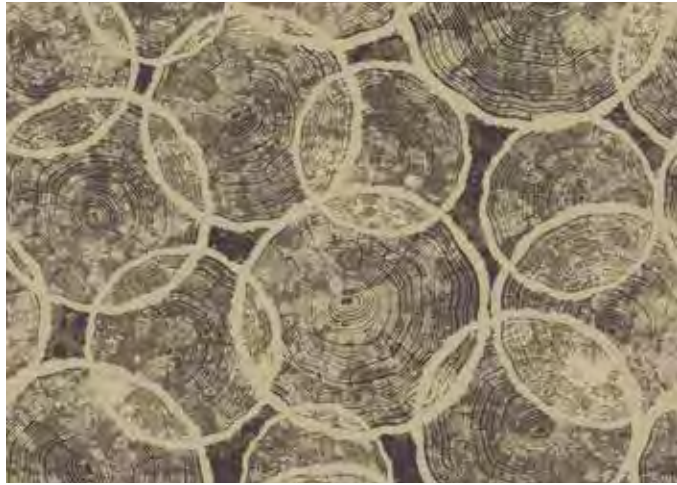

The Biophilique Collection features styles offered in Durkan's innovative Definity technology as well as PDI and CYP. Please contact your rep or visit www.durkan.com for more information.
