CLIMATE TAKE BACK™

Climate change is undeniable. And reversible. Our mission is to prove it. **Join the #ClimateTakeBack and help create a climate fit for life.**

World Woven Collection

Interface®

Interdeco™

World Woven™ Collection

In Interface studios around the world, designers work together to decipher trend and interpret it through the lens of local textile histories – from Japan to the UK, the Americas to Australia. In this process, one thing becomes very clear: the most elegant solutions are often the simplest. World Woven™ Collection, the 2016 addition to our global library of styles, is deeply influenced by this lesson.

Uncomplicated, hand crafted and imperfect are often the terms of beauty today. In a way, this seems more authentic and more accessible. Familiar objects conjure a sense of security, comfort and well-being. The World Woven Collection draws heavily from textile patterns and woven structures that embody all these things.

At the core of the collection are four patterns that were inspired by classic woolen textiles, rooted in the traditions of plain woven fabrics made for fashion, upholstery and home accessories that are still so essential today. The colors recall undyed wools with just a bit of contrast.

To complement this carefully curated set, are two color studies – one soft, less manicured and one flat and orderly. Following nature's method, each is comprised of many hues mingled together to create a more vivid rendering of color.

For the first time, we've attached three FLOR® by Interface styles, designed especially for the World Woven Collection. Collins Cottage™ and Scottish Sett™ revive the noble houndstooth and plaid while Mod Café™ renews the playful and optimistic patterns of the 1950s. These complimentary patterns can be included in a floor composition to define space, create area rugs or combine with the balance of the collection to add interest and detail.

World Woven Collection is six Skinny Planks™ and three FLOR squares, each with eight colors and made with 100% recycled content nylon. All nine styles weave together our current predilections with memories we share of some of the most enduring textiles of the past. They are simple, elegant fabrics that keep us warm and lift our spirits.

FLOR PRODUCT SCOTTISH SETT **COLOR** 105435 PLAID RAFFIA **INSTALLED** NON DIRECTIONAL

Why Our Modular Flooring?

Modular Flooring
Performance and flexibility. Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is easier to handle than bulky roll carpet and produces an average of just 3-4% waste compared to roll carpet's average of 14%. And it installs seamlessly with our LVT, no transition strips needed.

Carbon Neutral Floors™
Create a climate fit for life. All Interface flooring sold globally is third party verified carbon neutral. We've taken a holistic approach to achieve carbon neutrality, first through reducing the carbon footprint of our products and then using carbon offsets for the remainder, including the emissions from raw materials, our manufacturing processes and product use to end of life.

TacTiles®
No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

Intersept®
Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

ReEntry®
Recyclable is now a reality. Through our ReEntry program and partnerships with our fiber suppliers and recycling centers throughout North America, separated Type 6 and 6,6 nylon are recycled into new 6 and 6,6 nylon while separated GlasBac®, GlasBacRE, similar competitive backings and our own LVT are recycled into new GlasBacRE non-virgin PVC backing using our Cool Blue™ technology. The result? Products with up to 89% total recycled content, including as much as 27% post-consumer content.

Sustainable Choice
Environmental responsibility. More than 95% of Interface products manufactured in the Americas carry the GreenCircle Certified Environmental Facts label, which has verified that standard Interface products are manufactured using 99% renewable energy and offer a minimum of 66% and 80% total recycled content when backed with GlasBac and GlasBacRE backing respectively.

Transparency and certified sustainability leadership come standard on all Interface products, including published ingredients in HPDs (Health Product Declarations) or Declare Labels. In addition, more than 99% of our products globally have a published EPD (Environmental Product Declaration), which evaluates consistent factors based on full life cycle assessment (LCA). And, all Interface products with GlasBacRE backing are certified to the Platinum level of the NSF/ANSI 140 Sustainable Assessment for Carpet. GlasBac backed products meet the Gold level. NSF/ANSI 140 certified products contribute toward a USGBC or CaGBC LEED credit.

Samples
Order samples at www.interface.com. You'll receive email order confirmations, 24/7 access to order status and more. Not near a computer? You can also request samples by calling one of the numbers below.

InterCircle™ Sample Return
Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

Third Party Certification

Bureau Veritas – All Interface flooring sold globally is third party verified carbon neutral.

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see www.interface.com/disclaimer.

RECYCLED
Paper made from recycled material
FSC® C009723
PLEASE RECYCLE

Printed on 50% post consumer waste (PCW) fiber manufactured using wind power.

We have tried our very best to accurately represent product colors. However, due to the nature of printed materials, color of actual products may vary slightly. Please request a sample to see actual product color.
