Detours &
Detours Ahead

Climate change is undeniable. And reversible. Our mission is to prove it. Join the #ClimateTakeBack and help create a climate fit for life.

Interface®

Detours™ & Detours Ahead™

The main road might be the accepted way to go, but an alternative route can make for a much more interesting journey. Thanks to Mr. Frost, we know that taking the road "less traveled by" can make all the difference.

Detours and Detours Ahead steer our familiar 50cm squares in an all new direction. Relying on the classic neutral palette they share with the squares and planks of Common Theme™ Collection, both styles explore new ways to bring movement to the floor. The bold, angular pattern makes it seem as though these patterns are moving in more than one direction, activating the floor in a spirited way. Pattern plays across the surface like streams of light and shadows in Detours Ahead and with flickers of bright color added to highlight Detours.

Break the routine, choose a different road and discover what's new in Detours and Detours Ahead.

Why Our Modular Flooring?

Modular Flooring

Performance and flexibility. Interface's standard backing systems set the industry standard for modular performance. Tiles stay on the floor with no upcurl, no tapping and no rippling effect, yet are easy to selectively replace. Our modular carpet is easier to handle than bulky roll carpet and produces an average of just 3-4% waste compared to roll carpet's average of 14%. And it installs seamlessly with our LVT, no transition strips needed.

TacTiles™

No glue installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives. TacTiles are approved for use on GlasBac™, GlasBacRE, CQuest™GB, Graphlar™ and Graphlex™.

Intersept®

Mold protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde. Intersept is standard in Interface carpet tile products backed with GlasBac, GlasBacRE, CQuestGB, ReadyBac™, and CushionBac Renew™.

ReEntry™

Recyclable. Through our ReEntry program, we reclaim all Interface carpet tile. The result? Carpet tile products with up to 85% total recycled content, including as much as 25% post-consumer content.

Sustainability Transparency

Transparency and certified sustainability leadership come standard on Interface products, including published ingredients in HPDs (Health Product Declarations) and published EPDs (Environmental Product Declarations), which are based on full life cycle assessment (LCA). And, Interface carpet products are certified to the NSF 140 Sustainable Carpet Assessment Standard. Additionally, Interface flooring and recommended adhesives are 3rd party certified for low VOC emissions in compliance with California Department of Public Health (CDPH) Standard Method v1.2–2017. Carpet products made in our US facilities are made with 99% renewable energy.

Third Party Certification

The flooring products that we sell, including carpet tile, are carbon neutral across their full product life cycle through our third party verified Carbon Neutral Floors™ program. To find out more, visit interface.com/carbonneutral

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Samples

Order samples at interface.com. You'll receive email order confirmations, 24/7 access to order status and more. Not near a computer? You can also request samples by calling one of the numbers below.

InterCircle Sample Return

Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see interface.com/disclaimer.
