PERSPECTIVE IS MORE THAN WHAT YOU SEE—IT IS HOW YOU SEE IT.

Studying the relationship that design can have in setting the tone of a space, **MIXED MATERIALS CONVERGE** explores the emotional connection that transpires when colour and shape converge.

Focusing on the movement of color across a neutral canvas, the platform was created to be versatile, expressive and uniquely effortless. Individually, the pattern **CUBE & COLOUR** is enhanced as each of the three shapes creates its own distinct visual. Used together, the pattern takes on an entirely new perspective.

Uncover unique connections. Transform performance design. And converge at the intersection of human, object and idea where the foundation of good design lies.
