mission Ø

CLIMATE TAKE BACK™

Climate change is undeniable. And reversible. Our mission is to prove it. **Join the #ClimateTakeBack and help create a climate fit for life.**

Aerial™ Flying Colors

POW! The Aerial™ Collection just got a boost of color. Pure color tiles connect to “color-full” tiles; colorful tiles connect to transition tiles; and transition tiles connect to the strong, neutral foundation that skyrocketed Aerial from the start.

Aerial Planks, Aerial Squares and Aerial Neighborhood™ are now joined by Aerial Flying Colors, creating a library of 87 tiles in a full range of vibrant and neutral colors in squares and Skinny Planks.™

Aerial Flying Colors introduces two more styles to the Aerial Planks offering—AE315 and AE317, along with more colorways for both AE311 and On Line.™ Use AE315 to blend a spray of color to a neutral ground, creating that signature Interface transition tile, or cast a soft hue across the entire floor plane. Use AE317 to make a bold leap with a vibrant, mixed-hue approach to each colorway.

There are thirteen color sequences presented with an On Line bright at the top and a neutral at the bottom to accent, define and set color direction. But don’t just look up and down—look left and right across the full array to find your own unique combination.

The entire Aerial Collection is made with 100% recycled content nylon and is part of our i2® product family with benefits like mergeable dye lots that enhance selective replacement. These are just a couple of steps we take toward creating a climate fit for life. Join the **#ClimateTakeBack** movement.

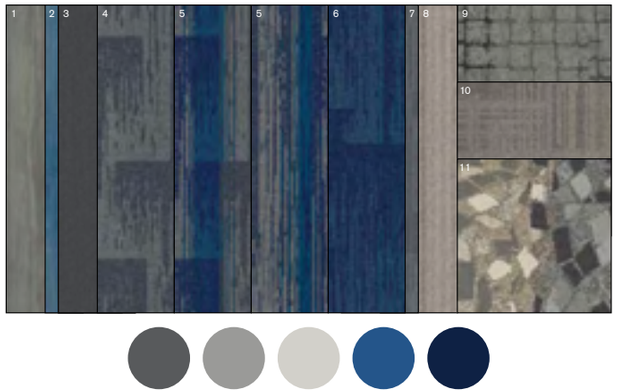
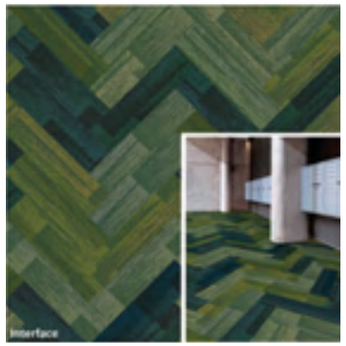
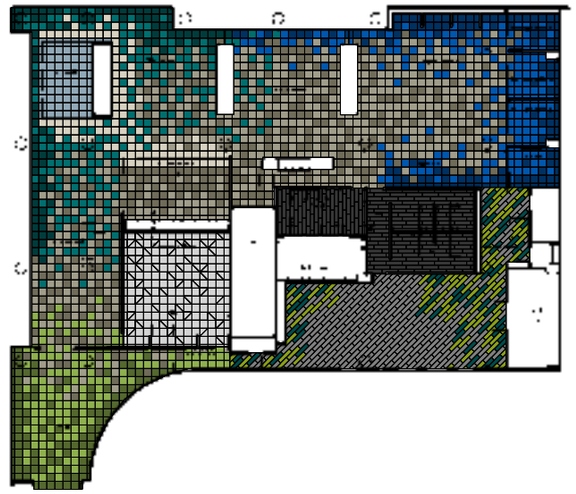
Let us make it yours

Interface Design Services can support your project from concept to completion, to help you think through your coolest ideas at any stage of your creative process.







Explore

YOU'LL KNOW IT WHEN YOU SEE IT

Call your rep, or schedule a consultation with our expert design team to translate your inspiration into product selections, color palettes and custom styles.

Refine

CONTEXT IS EVERYTHING

We'll create beautiful and distinct configurations to assist you in visualizing or communicating your ideas 3-dimensionally.

Plan

SEE THE WHOLE PICTURE

Our designers create to-scale floor plan layouts that calculate overall waste and act as an installation guide for your flooring contractor, all while expressing your vision within the context of your own drawings.

Why Our Modular Carpet?

i2® Modular Carpet
Minimize Waste & Save Money. Interface's i2 styles have mergeable dye lots. That means i2 tiles from different dye lots always blend with tiles of the same color, even when individual tiles are selectively replaced years later. This minimizes the need for attic stock and saves money. And i2 styles that install non directionally generate an average of only 1.5% installation waste as compared to 3-4% for typical modular carpet and an average of 14% for traditional roll carpet.

Cool Floor™
The Low Carbon Option. Help stop climate change. ALL Interface modular flooring sold in North America is third party verified climate neutral Cool Floor. We start by using low-carbon materials and manufacturing processes, then Cool Floor zeros out all remaining greenhouse gas (GHG) emissions associated with the entire life cycle of your flooring, from raw material extraction through use and recycling.

TacTiles®
No Glue Installation. Our revolutionary TacTiles installation system eliminates the need for glue, adhering tiles securely together to form a floor that "floats" for greater flexibility, easier replacement and long-term performance. The result? Less mess, less waste and virtually no VOCs, not to mention an environmental footprint that is over 90% lower than that of traditional glue adhesives.

Intersept®
Mold Protection. Our proprietary preservative, Intersept, protects our modular carpet against mold growth and odor-causing bacteria—guaranteed. Intersept treated carpet, with proper maintenance, shows no mold or bacterial growth when tested per the ASTM E2471 Standard Test Method. Intersept is EPA approved for safe use in carpet, water insoluble and contains no halogens, heavy metals, phenols or formaldehyde.

ReEntry®
Recyclable is Now a Reality. Through our ReEntry program and partnerships with our fiber suppliers and recycling centers throughout North America, separated Type 6 and 6,6 nylon are recycled into new 6 and 6,6 nylon while separated GlasBac®, GlasBacRE and similar competitor backings are recycled into new GlasBacRE non-virgin PVC backing using our Cool Blue™ technology. The result? Products with up to 89% total recycled content, including as much as 27% post-consumer content.

Sustainable Choice
Environmental Responsibility. Many Interface products carry the GreenCircle Certified Environmental Facts label, which has verified that standard Interface products offer a minimum of 66% and 80% total recycled content when backed with GlasBac® and GlasBacRE backing respectively, using 99% renewable energy.

In addition, more than 99% of our products globally have a published EPD (Environmental Product Declaration), which evaluates consistent factors based on full life cycle assessment (LCA). And, all Interface products with GlasBacRE backing meet the Platinum level of the NSF/ ANSI 140 Sustainable Assessment for Carpet. GlasBac or NexStep® Backed products meet the Gold level. All may contribute toward a USGBC or CaGBC LEED Innovation Credit.

Samples

InterCircle™ Sample Return
Help us close the loop on the carpet sampling process. Through our InterCircle Sample Return program, sample materials stay out of the landfill and are re-used as samples until it is time to recycle them into new carpet. By reducing sample production material and diverting old materials from the landfill, we can reduce our overall environmental footprint.

Call 1.877.605.1500 (U.S.) or 1.866.398.3192 (Canada) to order a sample return bag with a prepaid return label.

Third Party Certification

Cool Floor – Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire life cycle of your floor.

Environmental Product Declaration (EPD) – A statement of product ingredients and environmental impacts over the entire life cycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and LCA must be third party verified.

Sustainable Assessment for Carpet – The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus – An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

All product specifications reflect averages derived from product sample testing, are subject to normal manufacturing and testing tolerances and inherent pattern variances, and may be changed without notice. For more information about these and other important attributes of the product(s) described herein, including recycled content and product warranty information, please see www.interface.com/disclaimer.
