

reTHINK

shaw contract®

**rethinking
textile**

Our design team set out to rethink the way we use materials and construct flooring, weaving the boundary between hard and soft.

Combining hard surface durability with soft surface aesthetics, reThink woven LVT is a hybrid floor covering that weaves utilitarian purpose with textile appeal.

**made
by
design.**

redesigning the floor

A unique aesthetic, complex in texture,
durable in nature, smarter than ever.

made to perform

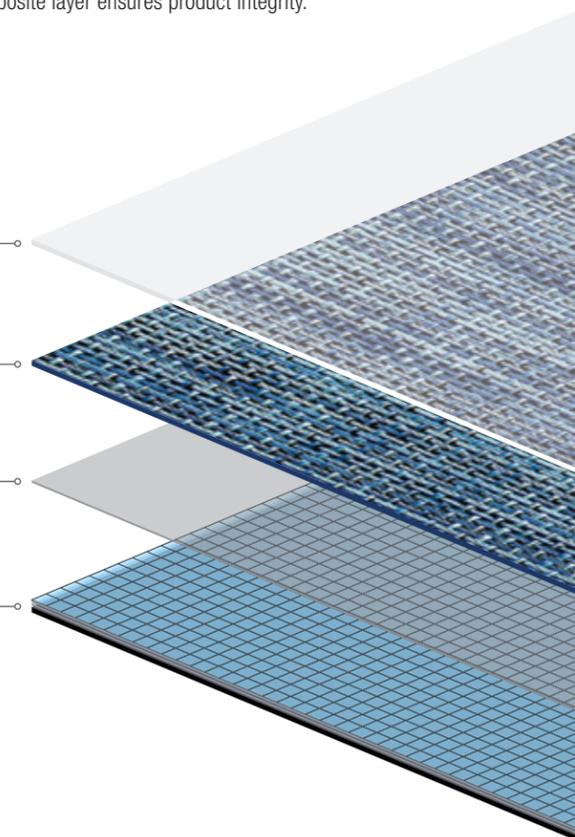

Layered for strength and fused into a single solid surface, reThink is constructed to resist stains and scuffing. The ExoGuard™ Quartz Enhanced Urethane finish prevents fraying and creates a barrier that stops spills and dirt from penetrating the woven fabric, making clean up easier. A stabilizing composite layer ensures product integrity.
